

## **Raytheon employees – serving our nation and its allies**

Raytheon Technical Services Company's Customized Engineering and Depot Support (CEDS) business unit provides vital services and products to serve America's warfighters and our allies.

With approximately 2,000 employees, CEDS is headquartered in Indianapolis, Ind., and has major operations in Norfolk, Va., Chula Vista and El Segundo, Calif., and Calgary, Alberta, Canada. These dedicated men and women provide customers with a broad spectrum of engineering, logistics, depot support and limited-production services that include:

- System refurbishment
- Mechanical and electronic fabrication
- Equipment remanufacture
- Testing
- Risk and vulnerability assessment
- Supply-chain management
- Inventory and asset management
- Sustainment planning and
- Field engineering.

The primary CEDS customers include the United States Department of Defense and all branches of its armed forces, Canada's Department of National Defense, the military forces of allied nations, U.S. federal agencies, including the Department of Energy, and commercial entities.

Key programs include mission systems and avionics software for the U.S. Marine Corps' MV-22 assault aircraft and the U.S. Air Force's CV-22 aircraft, as well as support services for:

- Firefinder Battlefield Radar
- WSC-6 surface search radar
- Seasparrow launcher — MK 29 Guided Missile Launching System
- Kidd Class Destroyer
- U.S. Navy Extremely High Frequency Satellite Program
- U.S. Air Force and U.S. Navy weather systems and satellite ground stations and
- National Weather Service systems and satellites.

Raytheon employees know that the work they do is vital to the safety and security of our nation, our citizens, our allies and our world. For that reason, they strive to continually improve their products, their processes and their performance. They view serving their customers and helping them to accomplish their missions as their patriotic duty, and they are justifiably proud of their success.
